

LOOPMAKER

29ZW0154A-256

KEY FEATURES

Loopmaker enables an installer to quickly make a wire loop on site, whether to secure a suitable drop wire or to link through or around a fixture.

It is the most flexible clutch mechanism available. The double clutches contained inside the smooth aesthetically pleasing aluminium body enable any size of loop to be made without limitation.

Height and loop size adjustment is achieved by depressing the plungers and could not be more simple, no tools are required. The loopmaker can be pre-assembled on to the wire prior to accessing the application, saving time and improving safety.

Safe working load is 18 kilos maximum

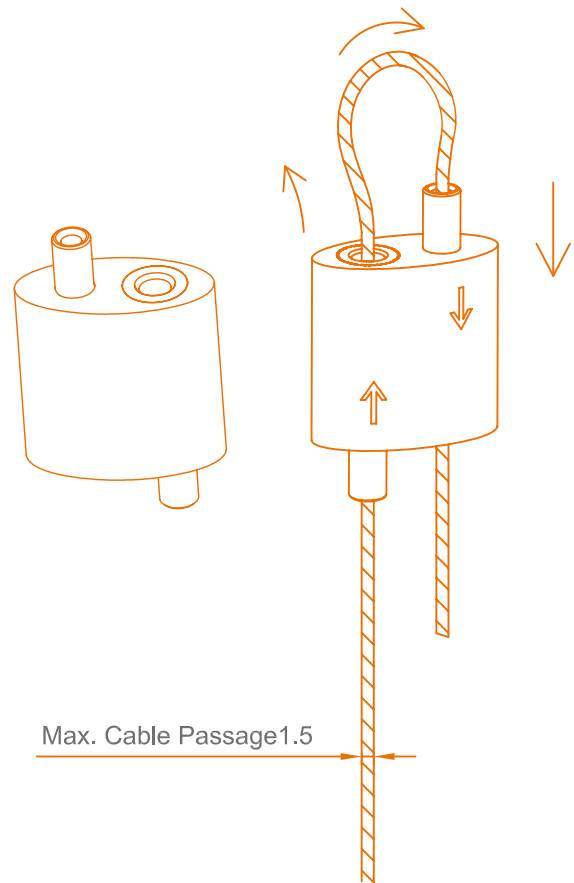

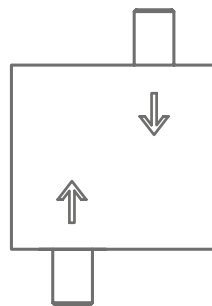

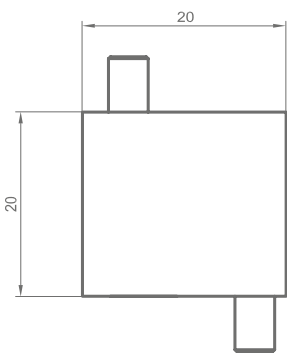

High quality aluminium finish

For use with 1.5mm galvanised wire

Use in conjunction with a looped wire to create a quick effective suspension system
