

SUSPENSION AND SPLITTER WIRES

KEY FEATURES

To complement our range of ceiling bosses and suspension clutches we manufacture suspension and splitter wires in the UK.

Suspension wires can be made to any length and are often fitted with a hexagon end stop ferrule, which locates within a ceiling boss. We can also provide a soft loop option.

Splitter wires tend to be shorter and are fitted with a variety of ferrules to give our customers a choice of methods to connect to the luminaire. A selection of our standard options are shown below, but should you require a different design this can be produced to your specification.

4mm Hex end stop

7mm Ball & shank

10mm x 2mm Tab
